

CSMFO Revenue Fundamentals II:

Special Financing Districts (SFD)

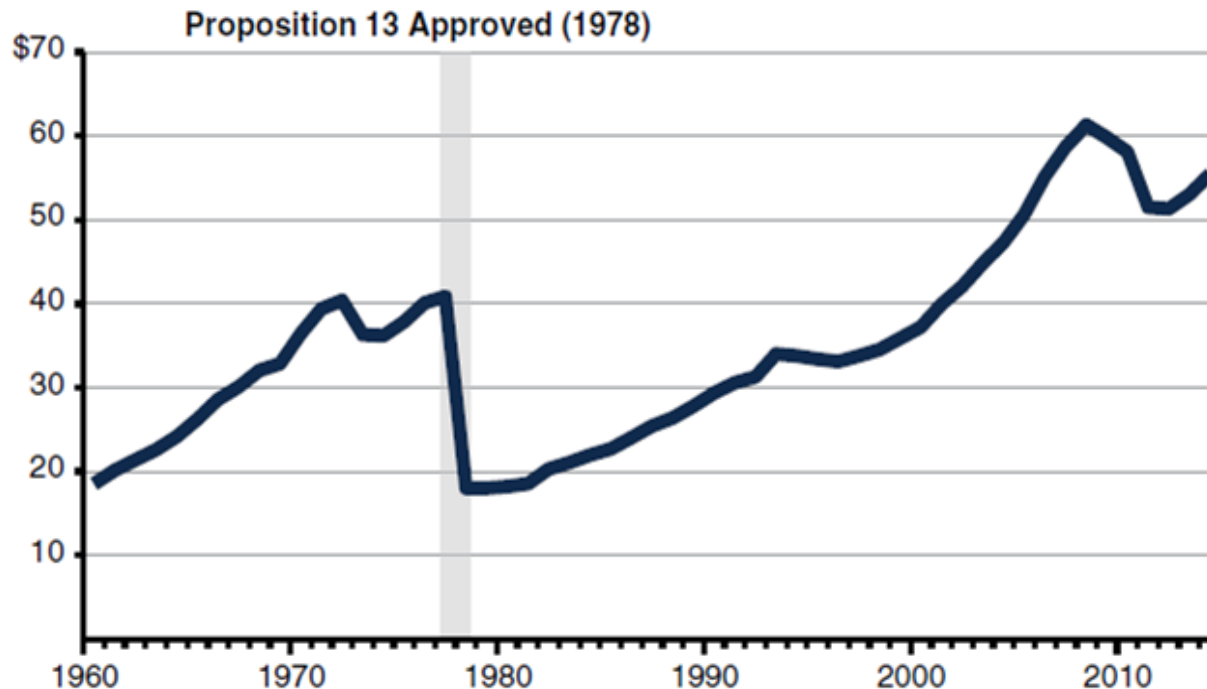

Tim Seufert
NBS

Why are we here today?

Local Government Revenue Dropped Immediately After Proposition 13

*Local Government Annual Property Tax
Revenue (In Billions, 2014-15 Dollars)*

Why are we here today?

Property Taxes:

- > 1977: > 90% of local
city/county revenues
- > 2016: < 66%

Why are we here today?

What filled the gap?

- Sales taxes
- Hotel taxes
- Utility taxes
- Parcel taxes
- Community Facilities Districts/CFD
- Special assessments
- Fees, rates and charges

What are your priorities?

Economic Development

Infrastructure

Ongoing Services

Lunch???

The fundamental process

Priorities and policies

1

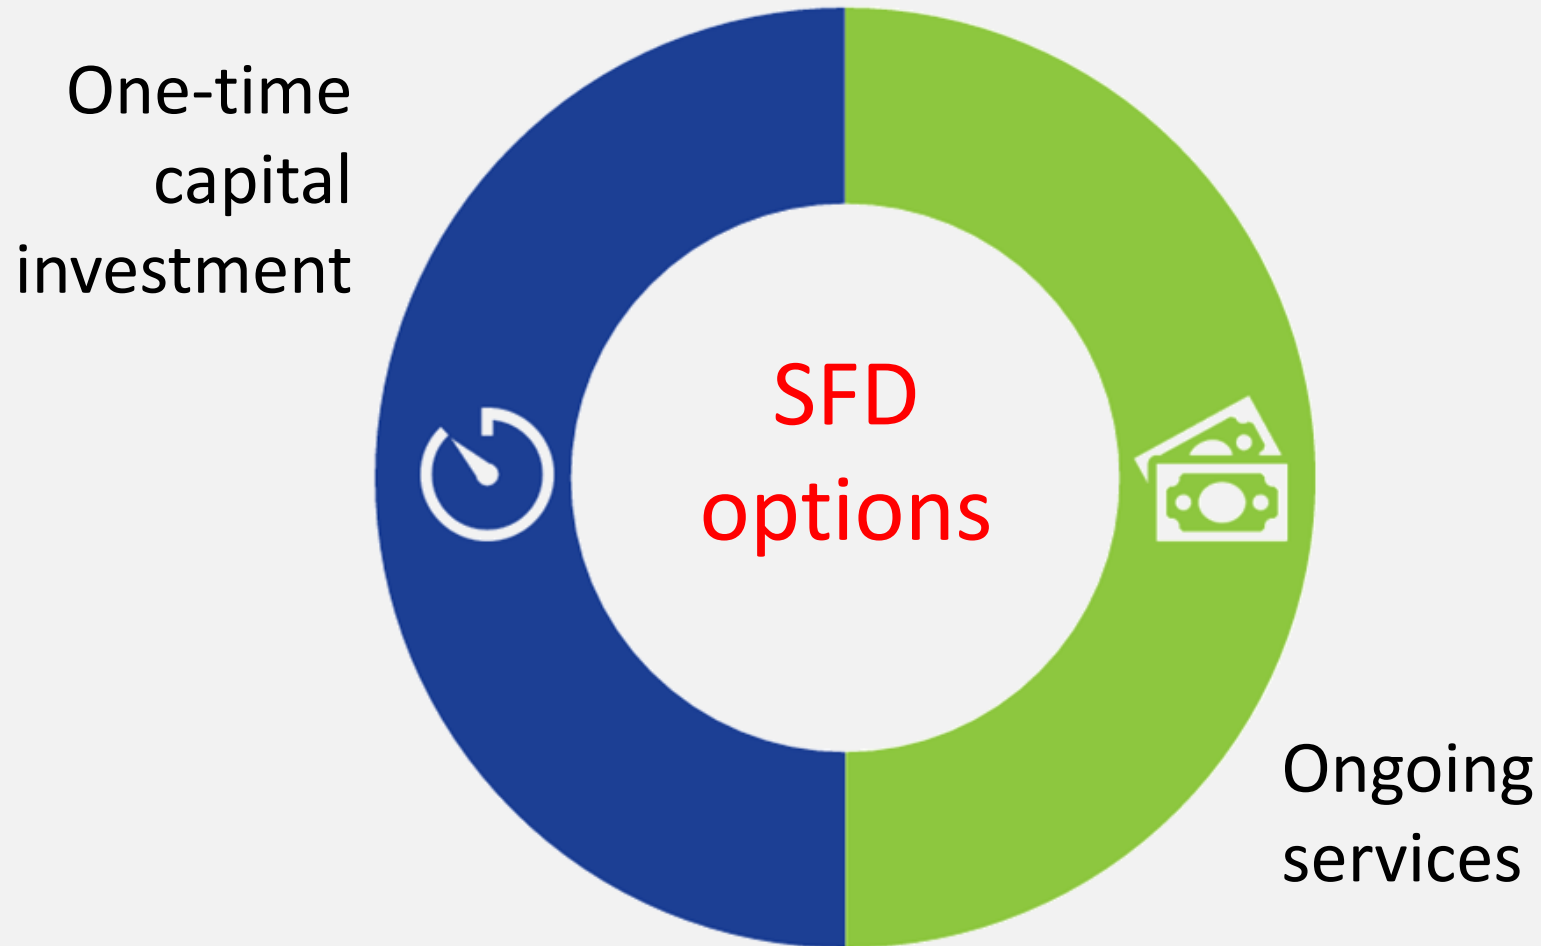

Priorities

Community needs and desires, fully vetted...

Choosing funding and financing tools

Capital vs. services

Capital vs. services

Taxes vs.
Assessments

California Constitution

SFD revenue tools: The short list

1

Community Facilities District, or CFD

2

“Special” Parcel Tax

3

Special Assessment Districts

4

The others: Property-related fee, EIFD?

Financing tools: A short list

1 **Municipal bonds, taxable or exempt**

2 **State Revolving Funds/iBank/Other**

3 **P3?**

4 **Bank Loans**

Let's talk economic development...

**Community infrastructure or
provision of services**

**Downtown revitalization or
conference center/hotels**

Infill Development

Downtown Burlingame Avenue

- Years of neglect and lack of consensus
- Funding challenges
- Interests coalesce
- Special assessment passed

San Francisco SOMA Plan Area

- Opt in CFDs
- Max revenues
- Trade off for increased height limits

Let's talk infrastructure...

Water/Wastewater/Recycled Water

Streets and Storm Drains

Civic Improvements

Los Carneros Recycled Water

- Special assessment
- Recycled water infrastructure
- Strong community support

Santa Cruz County Libraries

- CFD
- Renovate and rebuild libraries
- Community-wide support

Let's talk services...

Stormwater/NPDES

Schools and Libraries

Public Safety

Let's keep talking about services...

Groundwater (GSA/GMA)

Inspections/Code
Enforcement/Prop 64/Etc.

???

SF Bay Restoration Authority

- Parcel tax across 9 counties
- Bay restoration, and sea level rise?
- Voter approved tax

“Fun” facts: 36-66” sea level rise forecast, with 11,000,000 passengers per year at OAK, and 35,000 residents in Foster City...

City of Culver City

- Parcel tax for stormwater/NPDES
- Creek restoration/environmental perspective
- Voter approved tax

CFDs and Parcel taxes

NOT BENEFIT-BASED

- Reasonable metrics
- Achieves local goals and policies

APPROVAL MECHANISM

- Voter approved, still 2/3 required
- CFD landowner vote(s)

SAMPLE PROJECTS

- Schools and libraries
- New development
- Open space acquisition and maintenance

Special Assessments

ARE BENEFIT-BASED

- General benefit
- Rigor of assessment engineering
- Still viable...

APPROVAL MECHANISM

- Property-owner
- Protest ballot
- 50% + protest?

SAMPLE PROJECTS

- Infrastructure, new and replacement
- Ongoing maintenance
- PBIDs/CBDs

Property-related Fee (*not* water, sewer, trash)

ANALYTICAL RIGOR

- Voluntary nature?
- Analytical analysis

APPROVAL MECHANISM

- “Property-based fees” balloted

SAMPLES

- Palo Alto Storm drain fee
- CSA fees for roads, fire, etc.

Examples

Case studies:

1. CFD for public safety
2. Parcel tax for recreation and park services
3. Benefit assessment for fire services

CFD: Vacaville (developer-driven)

NEEDS AND POLICY AIMS

- Provide public safety services
- Mitigate negative fiscal impacts
- Fairness to payers

FORMATION AND APPROVAL

- Research and analysis
- Develop RMA (tax formula)
- Ballot and waiver (2/3)

ANNUAL ADMIN

- Tracking, calculating, and collections
- Responding to inquiries
- Annual reporting

INITIAL FORMATION

ONGOING

Parcel tax: GVRD

NEEDS AND POLICY AIMS

- Maintain parks
- Provide services for many users
- Fairness to payers

FORMATION AND APPROVAL

- Research and poll
- Educate and inform
- Develop tax formula
- Mailed ballot election (2/3)

ANNUAL ADMIN

- Tracking, calculating, and collections
- Responding to inquiries
- Annual reporting

INITIAL FORMATION

ONGOING

Benefit assessment: ECCFPD

NEEDS AND POLICY AIMS

- Maintain fire suppression services (Post 13 district)
- Fairness to payers

FORMATION AND APPROVAL

- Community discussions
- Detailed research
- Educate and inform
- Dev assessment
- Protest ballot (50%)

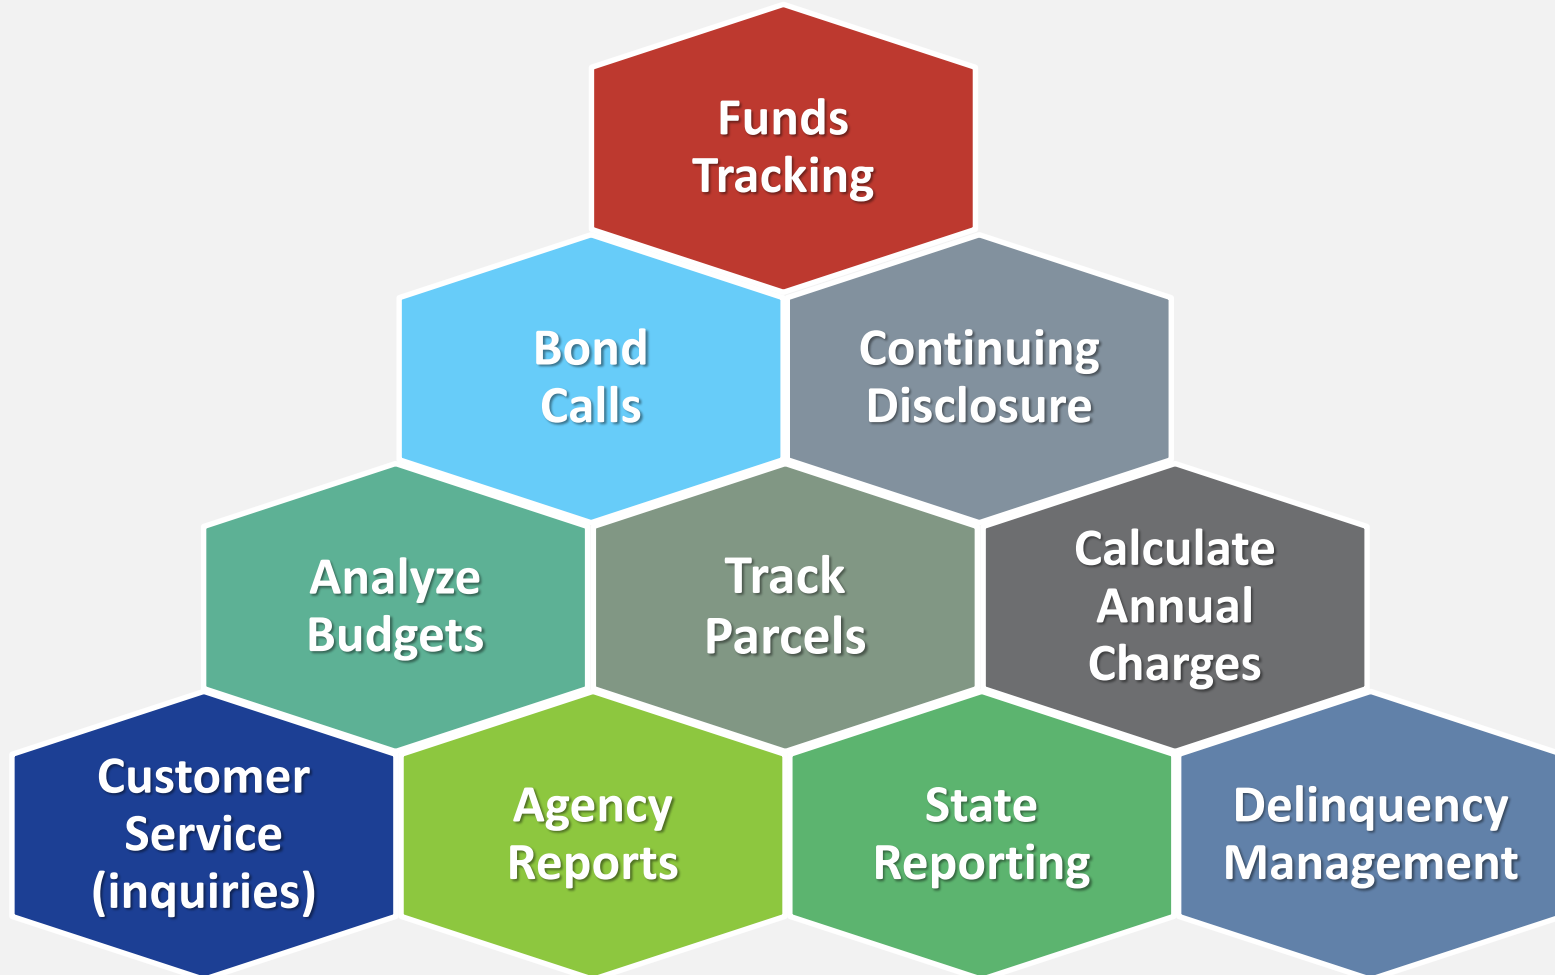

ANNUAL ADMIN

- Tracking, calculating, and collections
- Annual Engineers Report
- Inquiries
- Annual reporting

INITIAL FORMATION

ONGOING

Annual administration process

Recommended resources

Additional Resources:

- League Municipal Revenue Handbook
- NBS' SFD Primer and Compendium
- League and CSDA Proposition 218 Implementation Guides

CSMFO Revenue Fundamentals II:

Utility Rate Discussion

Tim Seufert
NBS

Utility rates and property-related fees

- Utility rates for water, sewer, trash
- Other “property-related fees”
- Capacity/connection fees

What the heck?

- Terminology: Fee vs rate vs tax
- Three “exceptions”
- Who provides service?

Water rate-making in California today

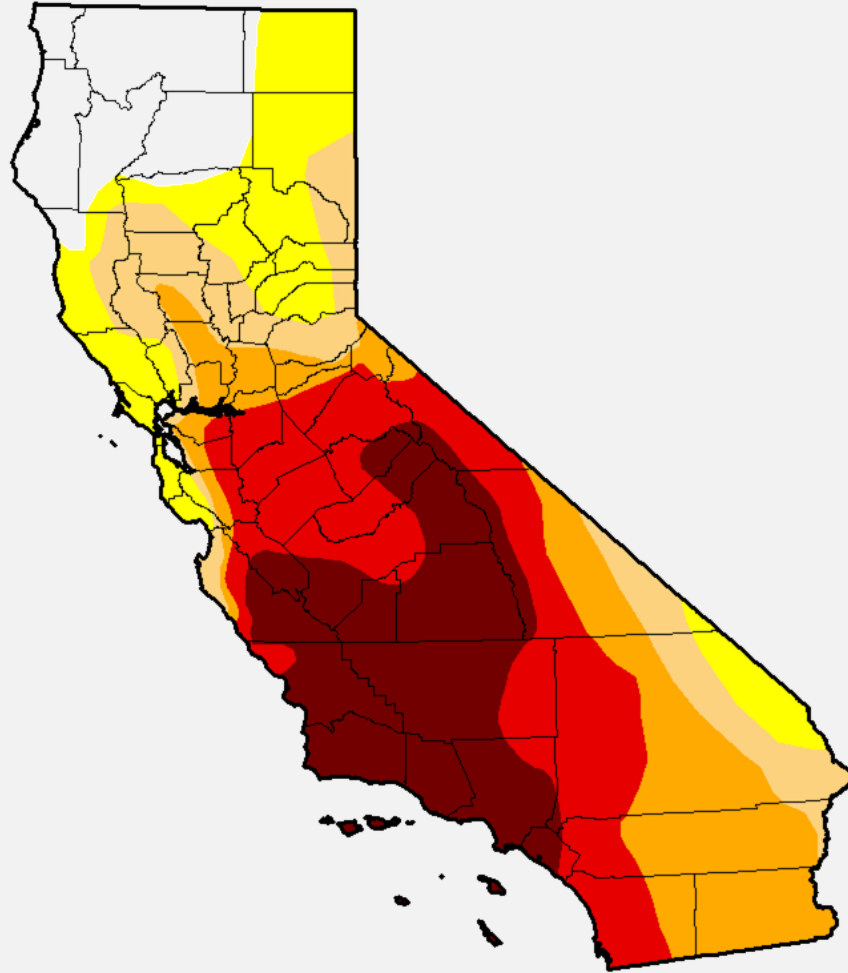

Water rate-making in California today

What is in the Gumbo?

- Drought effects
- Legal challenges
- Revenue instability
- Recycled water needs (DPR anyone?)
- Groundwater issues and challenges
- Critical capital infrastructure needs

California Drought Conditions

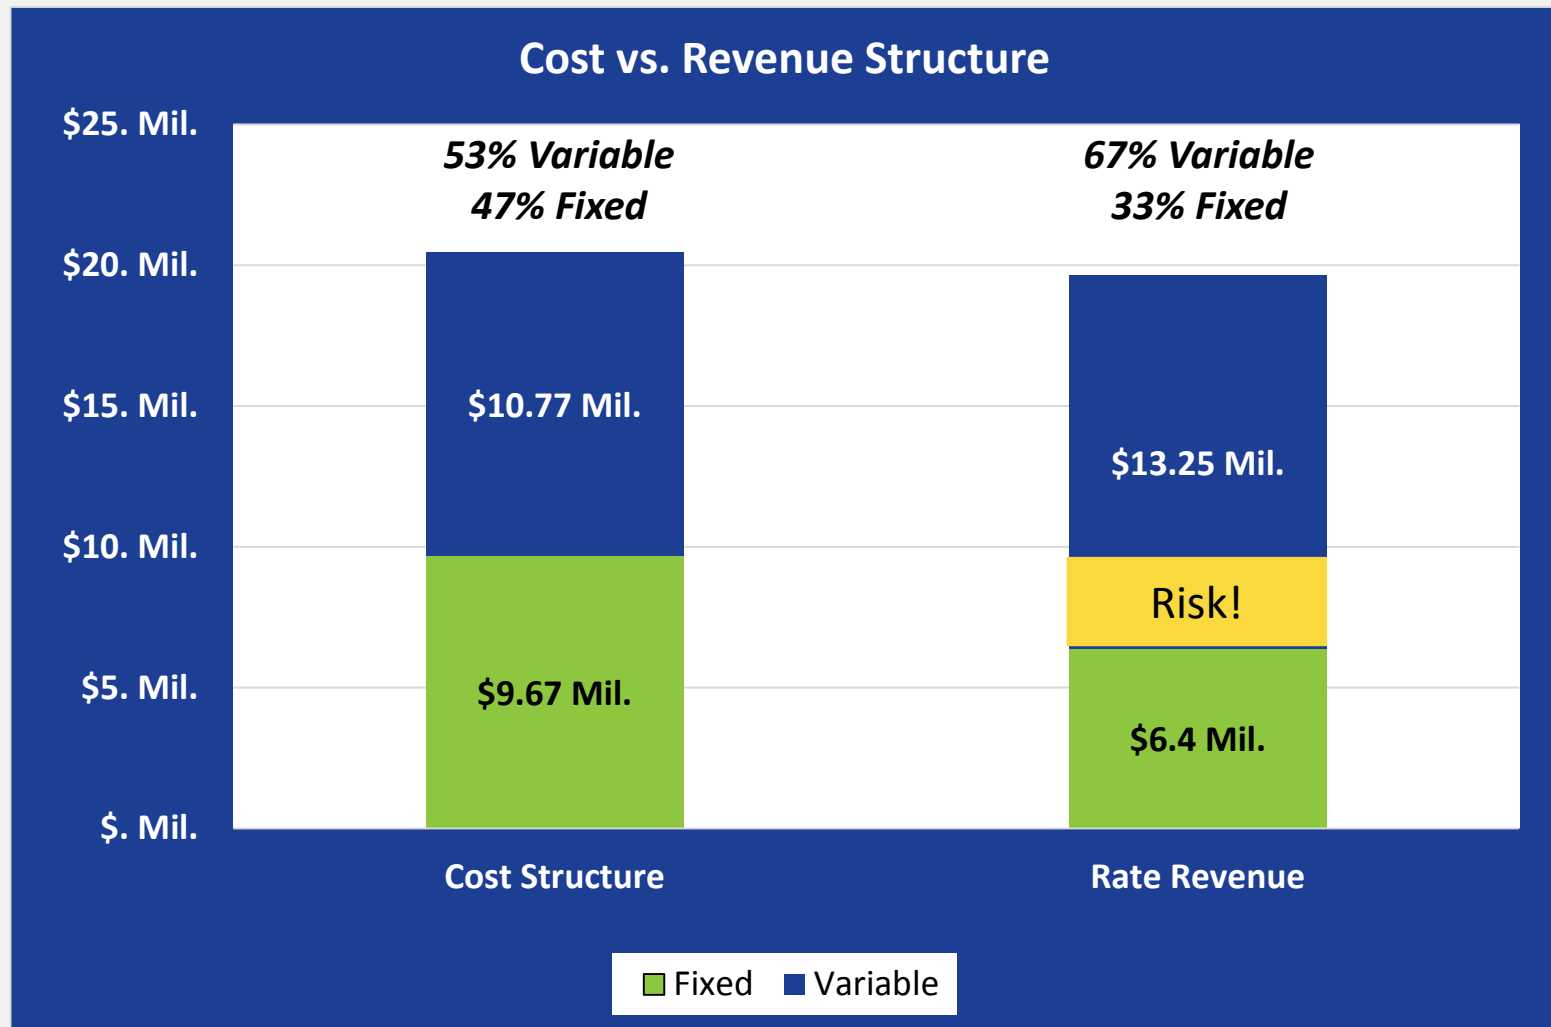

Legal challenges and more...

Bighorn case started it all...

- San Juan Capistrano tiered rate challenge
- Palmdale customer class case
- Wastewater challenges
- Town of Hillsborough penalties
- Etc.

[+ class actions?]

Revenue instability

Encouraging conservation, beyond tiers

Fines and Penalties

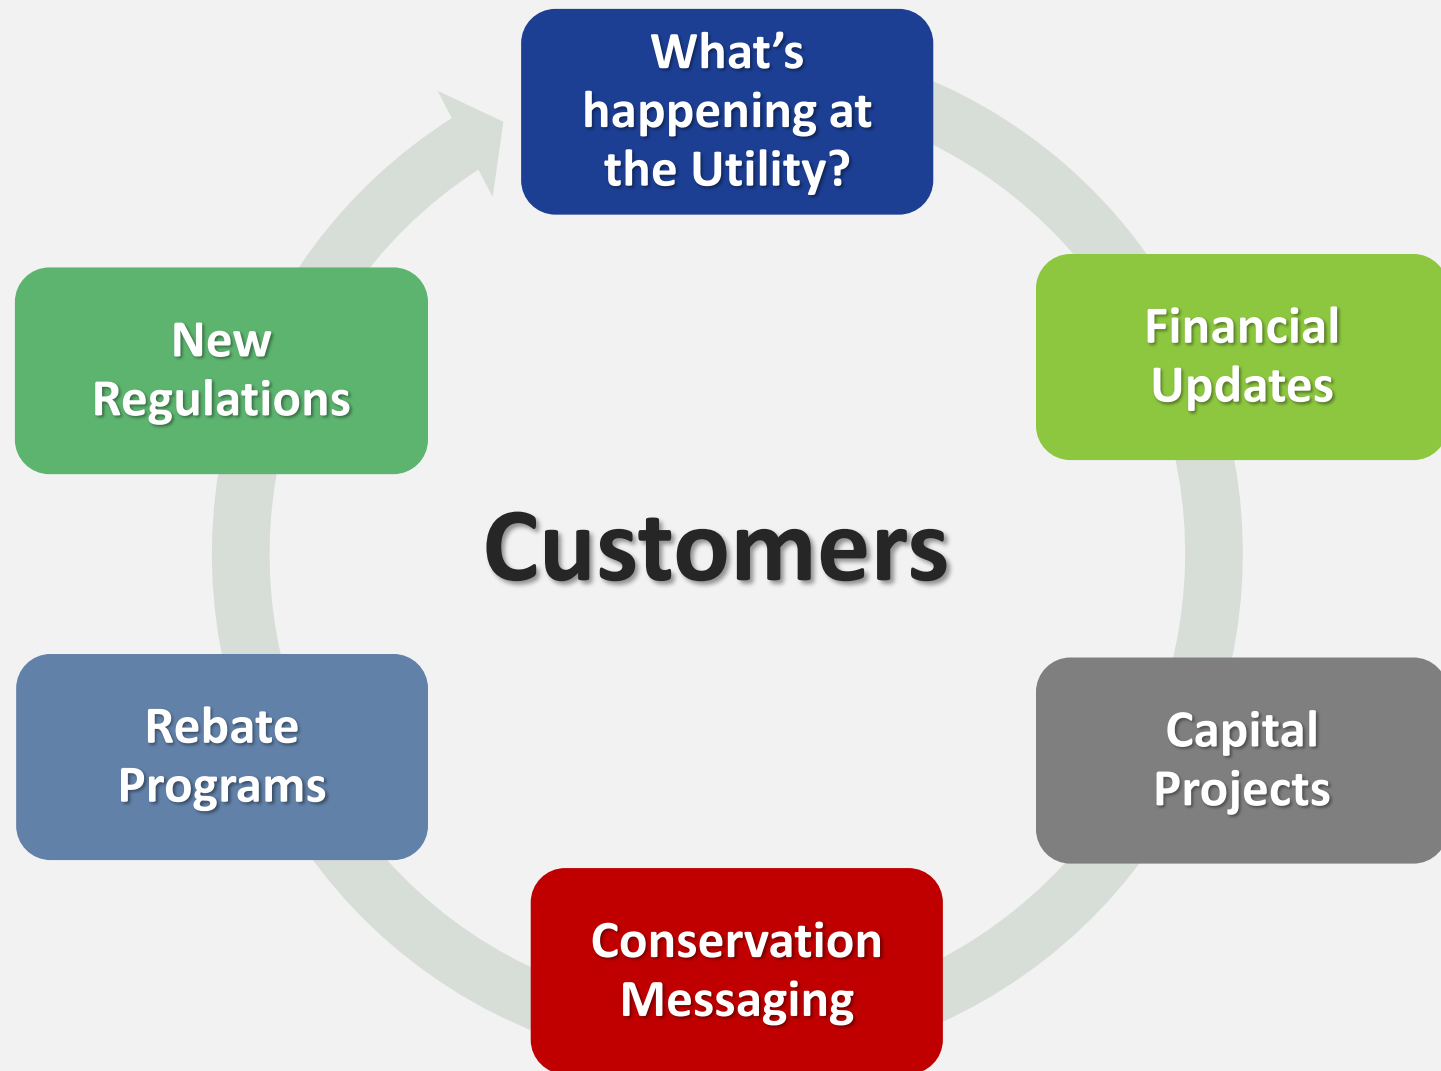

Incentives and Rebates

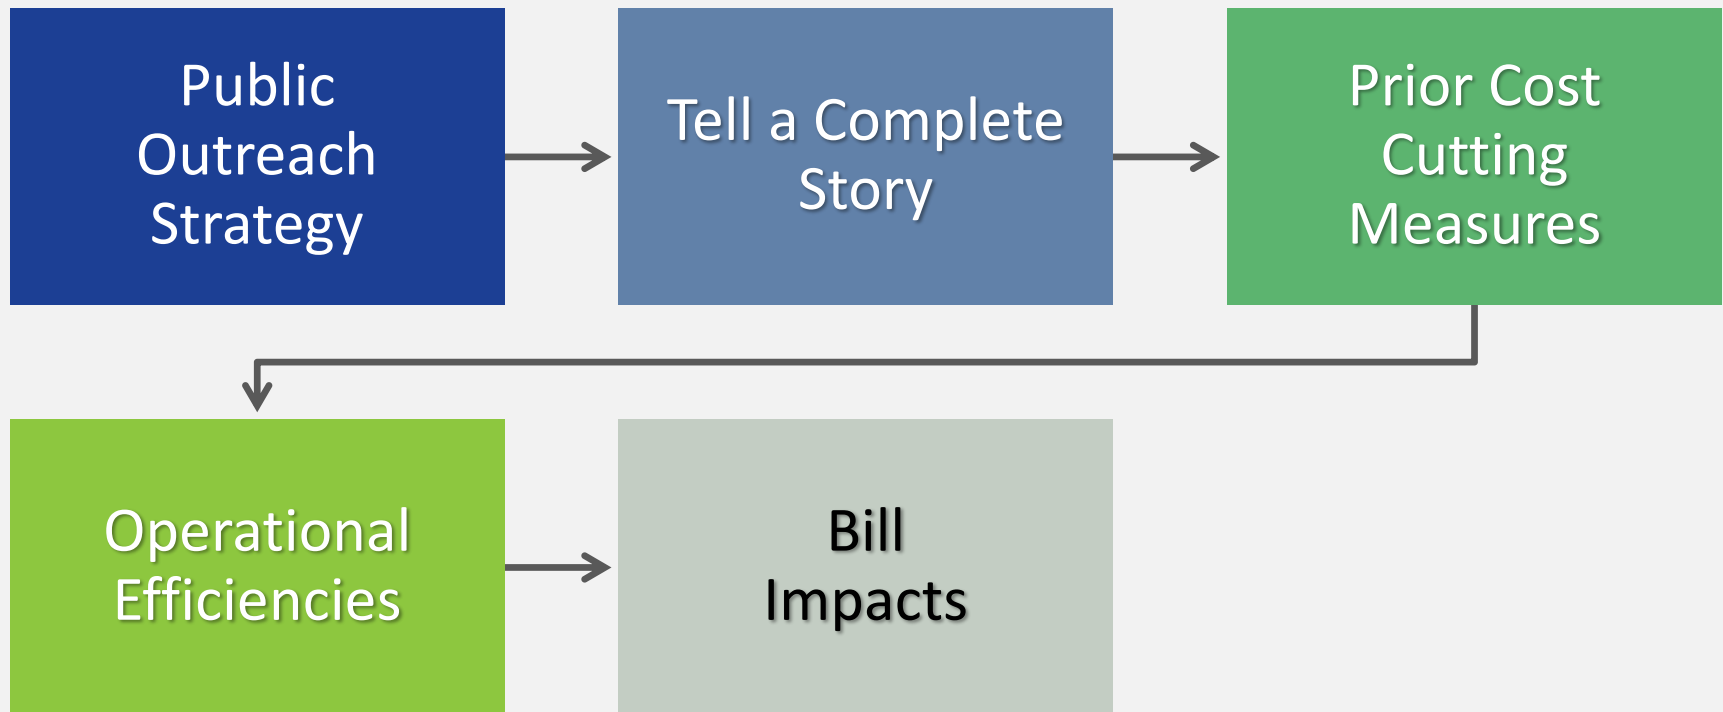

Communication

More on communication

Keys to a successful rate setting process

Senate Bill 814

- **Objective:** During a state of emergency or local water supply shortage, establish a method to identify and discourage excessive water use.
- **Targeted water usage:** Single-family residential customers or individually metered (or sub metered) multi-family residential customers.
- **How to comply:** Rate structure *or* excessive use ordinance and penalties.

Meeting SB 814 requirements

Rate Structure

- Addition to base rates to discourage excessive use
- Tiered rates
- Water budgets
- Rate surcharges

OR

Excessive Use Ordinance

- Definition/procedure to identify and address excessive water use
- Process to issue written warnings and perform site audit
- Penalty or fine of up to \$500/hcf used above excessive use threshold

Draft Framework - Executive Order B-37-16

Four Main Objectives:

- ✓ Use Water More Wisely
- ✓ Eliminate Water Waste
- ✓ Strengthen Local Drought Resilience
- ✓ Improve Agricultural Water Use Efficiency and Drought Planning

Anatomy of a water/sewer rate study

Developing a cost basis for rates

Accounting/Cost

Water Supply

System Design/Operation

Case in point on wastewater...

City of Sausalito study

- Volumetric rates
- Enhanced analysis of customer classes and usage data
- Better synchronicity between residential and non
- Marin Grand Jury comments

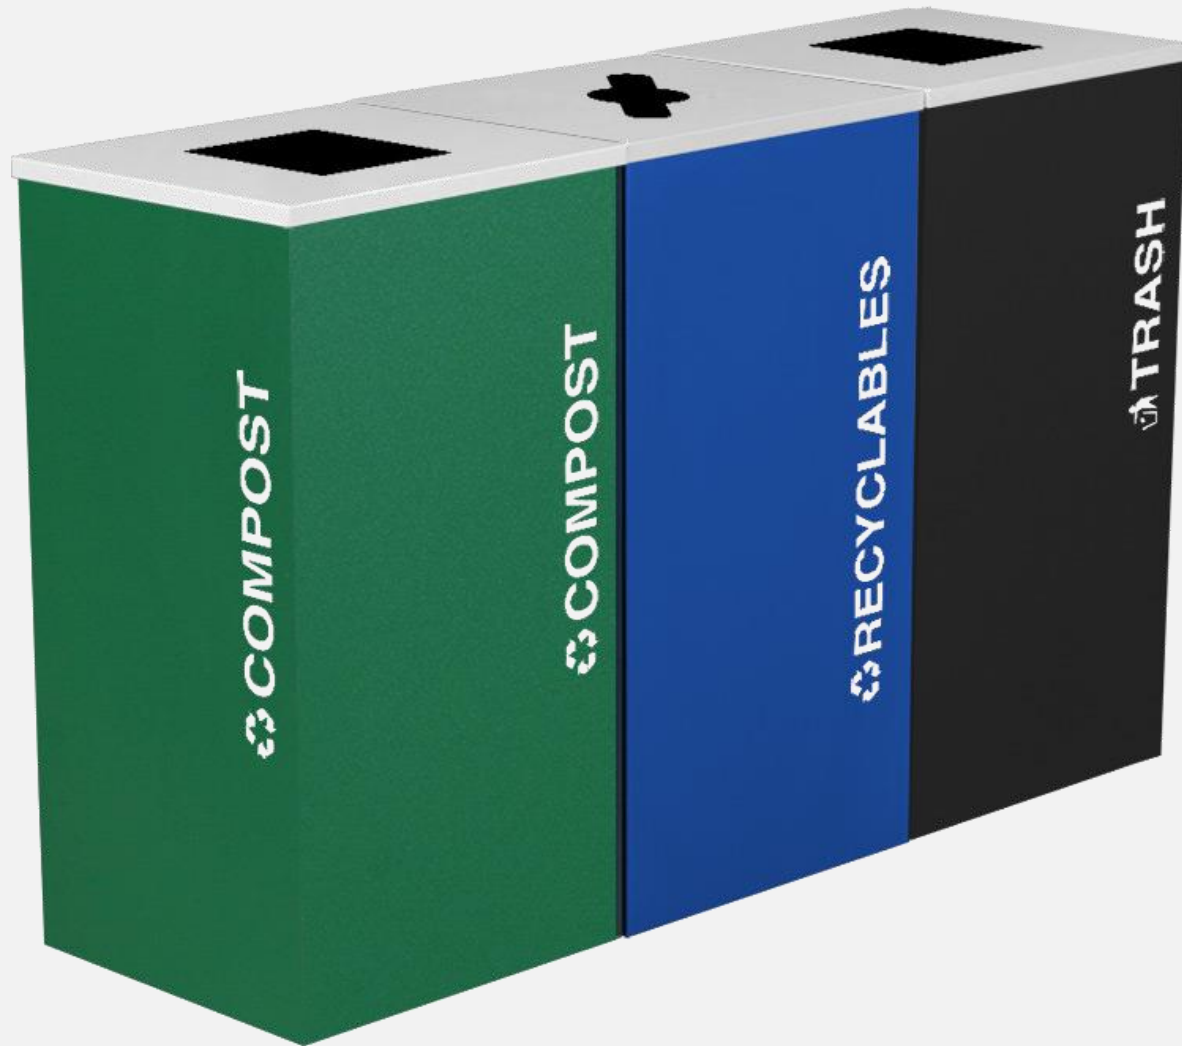

Storm drain fees?

Still need analysis and approval process

- Property-related fee?
- Parcel tax?
- G.O. bond?
- DIF?
- Etc.

Trash, recycling, composting...

Trash, recycling, composting...

Some of the issues:

- Conundrum of encouraging more recycling vis a vis cost
- Cost allocation/rate setting between different sizes of cans, and residential vs. commercial
- Developing [expensive] composting systems for green waste
